A LIMITED TIME ONLY!

Why Choose This Kit!

Tapered caps and plugs provide a completely flexible and versatile solution.

They can be placed on a component as a cap, or inserted into a port as a protective plug.

They are designed to fit a wide range of applications and protect from contaminants and debris.

The cap/plugs can easily be removed and can also be used along with both standard SAE-type hydraulic, fittings and adaptors - both threaded or non-threaded fittings if needed.

About Our Kit

Kit contains the following tapered caps and plugs in 20 sizes:

- » Tapered caps that will cover openings from sizes 1/8" though 1-1/4"
- » Plugs for standard openings ranging from sizes 1/8" through 1-1/2"
- » These caps and plugs are used to stop hydraulic hoses from leaking while doing maintenance, storage or shipping.
- » Used for male and female fittings.
- » Tapered feature keeps cap and plug on tight.
